

STARTING FLUID SPRAY

BENEFITS

- ✓ Enables quick starting of petrol and diesel engines
- ✓ Especially effective with cold starts during cold or wet seasons
- ✓ Prevents carburetors from freezing
- ✓ Applies easily

USE

In cars, trucks, agriculture and industry applications.

DIRECTION

Shake well before use. For petrol engines: spray into the carburetor or vacuum hose.
For diesel engines: spray into the air inlet. Spray moderately to avoid excessive fluid and uncontrolled running of the engine.

DOSAGE

To be used whenever required.
